

1. Verify That You Have Java

First, check if you have the Java Developer Kit, version 7 or greater already installed. To check if you have JDK installed (and which version), open a terminal window and type: `java -version` and hit enter.

The example below shows Java version 8.0_05 -- the version number comes after the "1."

```
Microsoft Windows [Version 6.1.7601]
Copyright (c) 2009 Microsoft Corporation. All rights reserved.

C:\Users\temp>
C:\Users\temp>java -version
java version "1.8.0_05"
Java(TM) SE Runtime Environment (build 1.8.0_05-b13)
Java HotSpot(TM) 64-Bit Server VM (build 25.5-b02, mixed mode)

C:\Users\temp>
```

If you have Java 7 or greater, your computer is set up!

If the JDK is **not** available, or the version is lower than 7, go on to Step 2 below.

2. Download the Java Development Kit

Download the Java Development Kit, aka, the JDK, from [this page](#).

Oracle, the company that maintains Java, has a lot of options and acronyms. We're looking for the plain old JDK. This is the kit you need to start developing your apps with Java.

As of May 2015, the download icon for the JDK looked like this:

After you click the download link, you'll see a list of options for download. Go to the **Java SE Development Kit** menu of options. Do not go to the demos and samples (the menus look very similar, so make sure to read the heading at the top).

Install

You've got a lot of options here, but the two you care about are the Windows options.

If your computer is only a few years old, you're most likely going to download the 64-bit option. If your computer is a little older you can [follow these instructions](#) to double check.

I'm going to download the 64-bit option (highlighted below).

Java SE Development Kit 8u45		
You must accept the Oracle Binary Code License Agreement for Java SE to download this software.		
<input type="radio"/> Accept License Agreement <input checked="" type="radio"/> Decline License Agreement		
Product / File Description	File Size	Download
Linux x86	146.89 MB	jdk-8u45-linux-i586.rpm
Linux x86	166.88 MB	jdk-8u45-linux-i586.tar.gz
Linux x64	145.19 MB	jdk-8u45-linux-x64.rpm
Linux x64	165.24 MB	jdk-8u45-linux-x64.tar.gz
Mac OS X x64	221.98 MB	jdk-8u45-macosx-x64.dmg
Solaris SPARC 64-bit (SVR4 package)	131.73 MB	jdk-8u45-solaris-sparcv9.tar.Z
Solaris SPARC 64-bit	92.9 MB	jdk-8u45-solaris-sparcv9.tar.gz
Solaris x64 (SVR4 package)	139.51 MB	jdk-8u45-solaris-x64.tar.Z
Solaris x64	95.88 MB	jdk-8u45-solaris-x64.tar.gz
Windows x86	175.98 MB	jdk-8u45-windows-i586.exe
Windows x64	180.44 MB	jdk-8u45-windows-x64.exe

Accept the license agreement, and download it. Once you've downloaded it, go ahead and double click it to install.

3. Verify That You Have Java

Go back to Step 1 and confirm that you have Java version 7 or higher installed.

Do not move on with Android Studio install until after you have installed the JDK. Without a working copy of Java, the rest of the process will not work. If you can't get the download to work, look for error messages, and try googling to find a solution.

Installing the Java Development Kit: Mac Guide

1. Verify That You Have Java

First, check if you have the Java Developer Kit, version 7 or greater already installed. To check if you have JDK installed (and which version), open a terminal window and type: `java -version` and hit enter.

The example below shows Java version 8.0_45 -- the version number comes after the "1."

```

Terminal — bash — 80x24
Last login: Fri May 22 15:26:16 on ttys000
JK ~ $ java -version
java version "1.8.0_45"
Java(TM) SE Runtime Environment (build 1.8.0_45-b14)
Java HotSpot(TM) 64-Bit Server VM (build 25.45-b02, mixed mode)
JK ~ $

```

If you have Java 7 or greater, your computer is set up!

If the JDK is **not** available, or the version is lower than 7, go on to Step 2 below.

2. Download the Java Development Kit

Download the Java Development Kit, aka, the JDK, from [this page](#).

Oracle, the company that maintains Java, has a lot of options and acronyms. We're looking for the plain old JDK. This is the kit you need to start developing your apps with Java.

As of May 2015, the download icon for the JDK looked like this:

After you click the download link, you'll see a list of options for download. Go to the **Java SE Development Kit** menu of options.

Do not go to the demos and samples (the menus look very similar, so make sure to read the heading at the top).

Install

Select the JDK for your operating system (Mac OSX). In most cases, if you have a machine that is less than 4 years old, you should choose the **x64** (64-bit) version (highlighted below). Search online for instructions if you have an older machine and are unsure what version to download.

Java SE Development Kit 8u45		
You must accept the Oracle Binary Code License Agreement for Java SE to download this software.		
<input type="radio"/> Accept License Agreement <input checked="" type="radio"/> Decline License Agreement		
Product / File Description	File Size	Download
Linux x86	146.89 MB	jdk-8u45-linux-i586.rpm
Linux x86	166.88 MB	jdk-8u45-linux-i586.tar.gz
Linux x64	145.19 MB	jdk-8u45-linux-x64.rpm
Linux x64	165.24 MB	jdk-8u45-linux-x64.tar.gz
Mac OS X x64	221.98 MB	jdk-8u45-macosx-x64.dmg

Windows x86	175.98 MB	jdk-8u45-windows-i586.exe
Windows x64	180.44 MB	jdk-8u45-windows-x64.exe

Accept the license agreement to download and locate the file, and double click it to begin the installation process.

3: Verify That You Have Java

Go back to Step 1 and confirm that you have Java version 7 or higher installed.

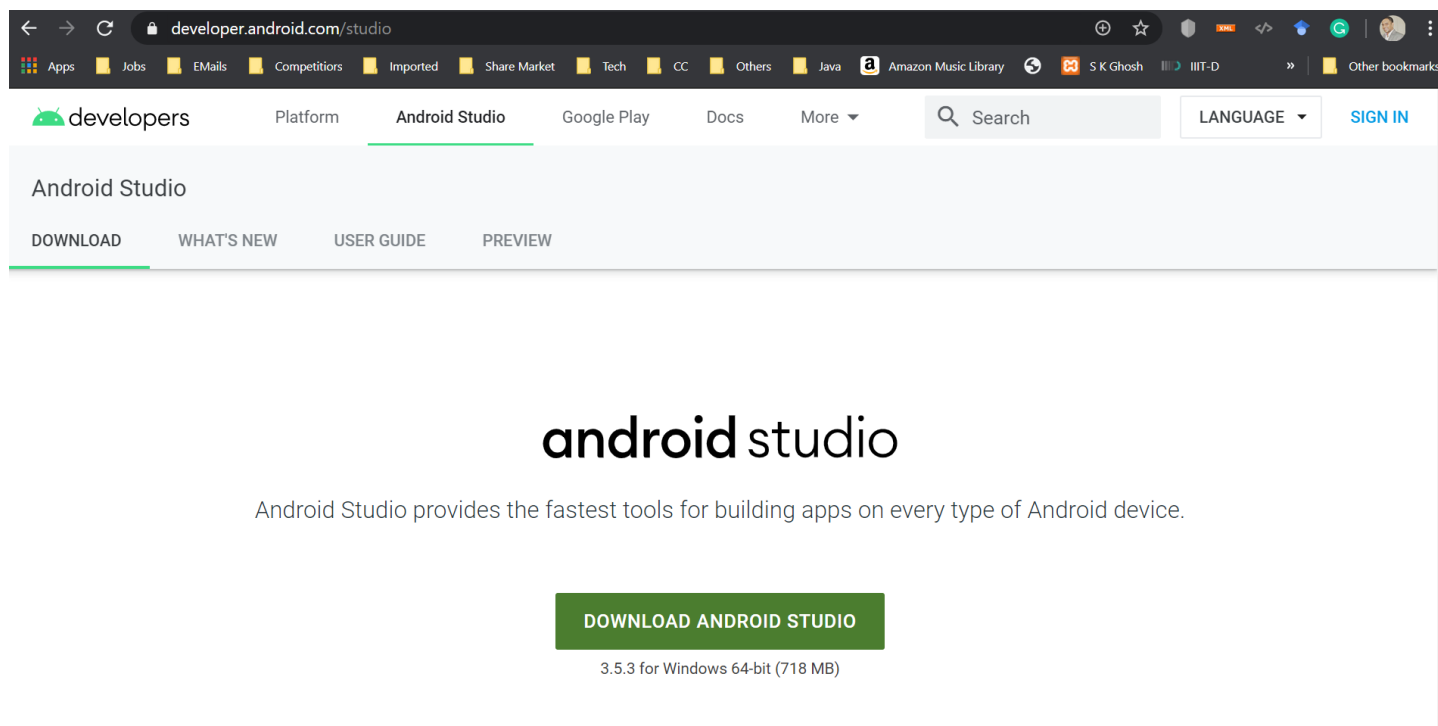

Do not move on with Android Studio install until after you have installed the JDK. Without a working copy of Java, the rest of the process will not work. If you can't get the download to work, look for error messages, and try googling to find a solution.

Windows: Guide to Install Android Studio

- Note 1: Install JDK before you proceed for installing *Android Studio IDE*.
- Note 2: For instructions to install Android Studio in Mac OS, go to [this page](#).
- Note 3: Appearance of the *installation wizard* may change over time. However, the installation steps would remain the same.

Step 1. Download Android Studio

Navigate to the [Android developers' site](https://developer.android.com/studio). This page will automatically detect your operating system. Click on the "DOWNLOAD ANDROID STUDIO" button.

It will open up the **Terms and Conditions** pop-up. Select the checkbox that says *"I have read and agree with the above terms and conditions"* and click the "DOWNLOAD ANDROID STUDIO FOR WINDOWS" button to start the download.

Download Android Studio

Before downloading, you must agree to the following terms and conditions.

Terms and Conditions

This is the Android Software Development Kit License Agreement

1. Introduction

1.1 The Android Software Development Kit (referred to in the License Agreement as the "SDK" and specifically including the Android system files, packaged APIs, and Google APIs add-ons) is licensed to you subject to the terms of the License Agreement. The License Agreement forms a legally binding contract between you and Google in relation to your use of the SDK.

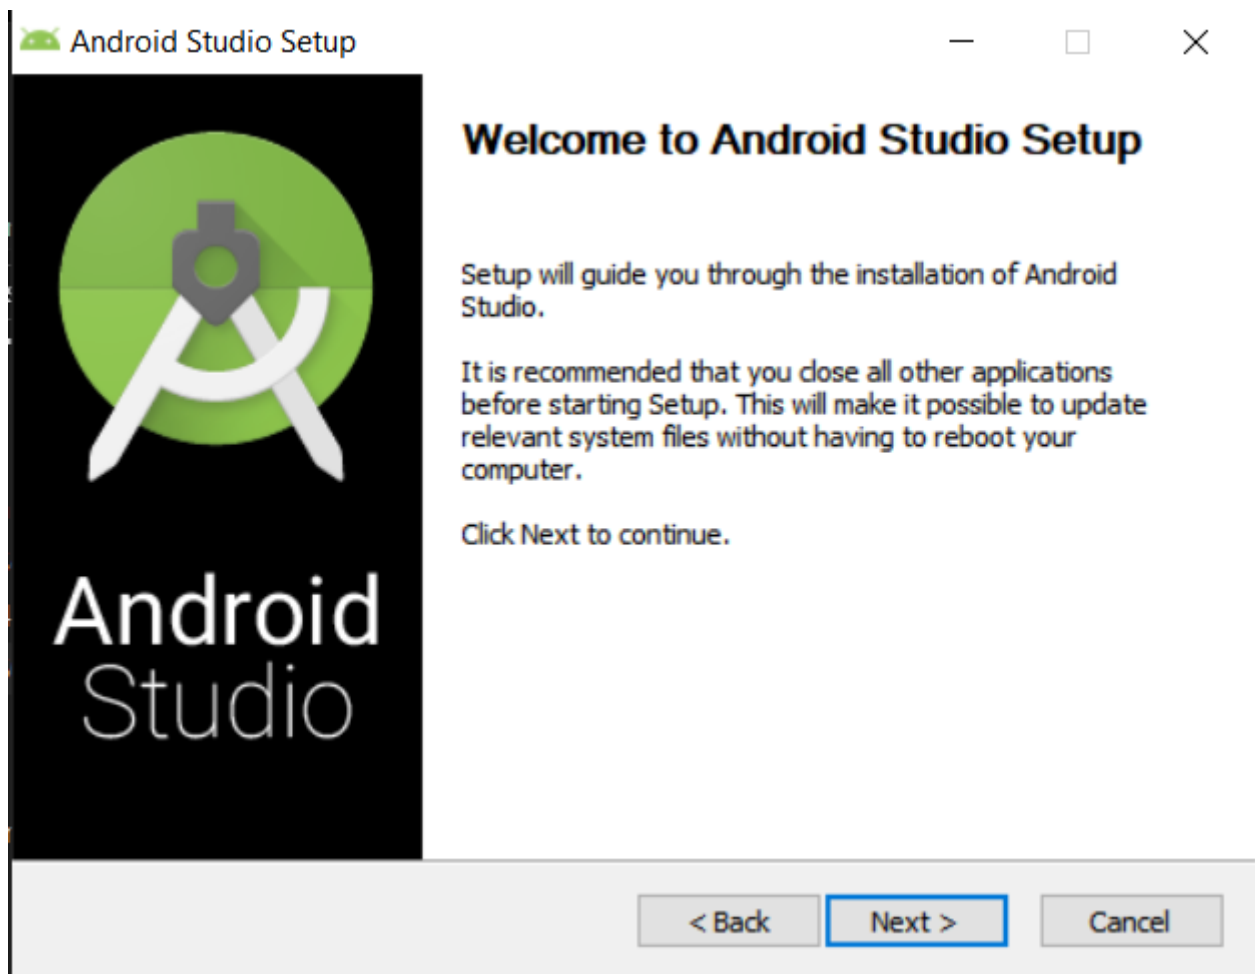

☒ I have read and agree with the above terms and conditions

DOWNLOAD ANDROID STUDIO FOR WINDOWS

android-studio-ide-191.6010548-windows.exe

Step 2. Install Android Studio

Right-click the downloaded **.exe** file and select to *Run as Administrator*. It will start the Android Studio installation wizard as follows:

You need to follow the prompts and accept the default for all steps. In the next window, choose all the components to be installed:

**Choose Components**

Choose which features of Android Studio you want to install.

Check the components you want to install and uncheck the components you don't want to install. Click Next to continue.

Select components to install:

- ☒ Android Studio
- ☒ Android Virtual Device

Description

Position your mouse over a component to see its description.

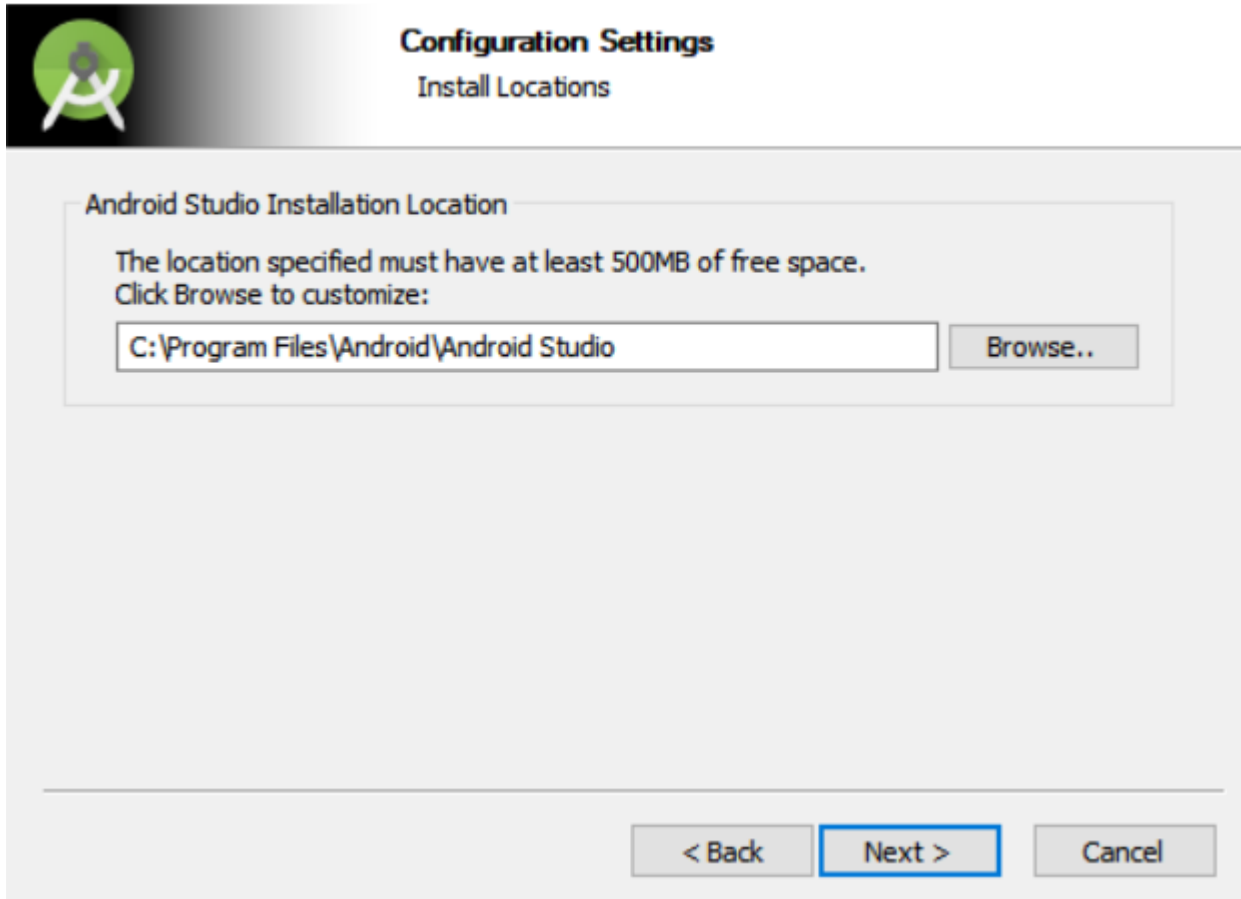

Space required: 2.3GB

< Back

Next >

Cancel

Select the default configuration settings:

Select the default start menu:

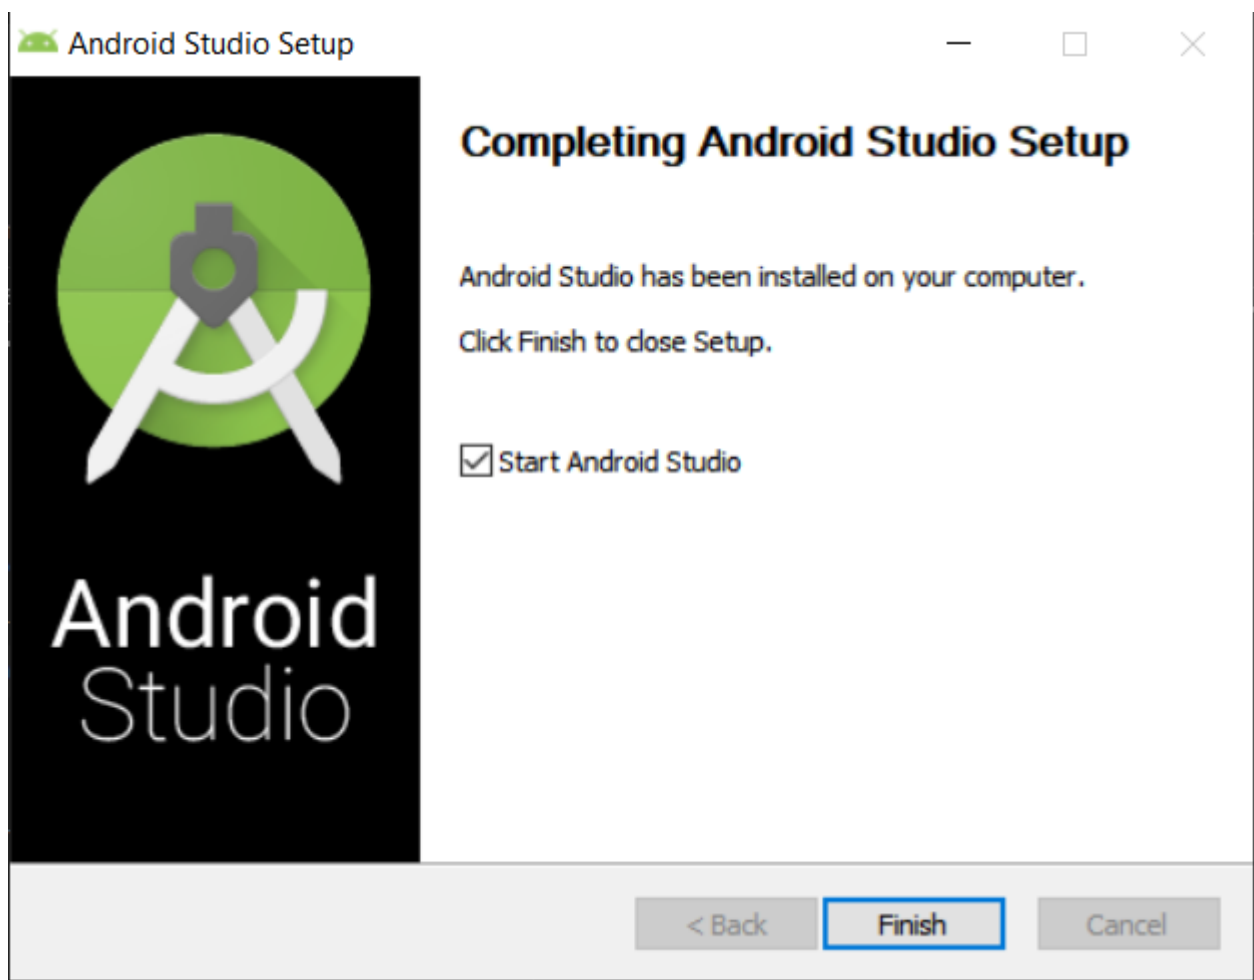

The installation wizard will download some additional components. This step might take some time depending on your internet speed.

The following window would confirm the successful *download* of all the necessary components. Click on the “Finish” button.

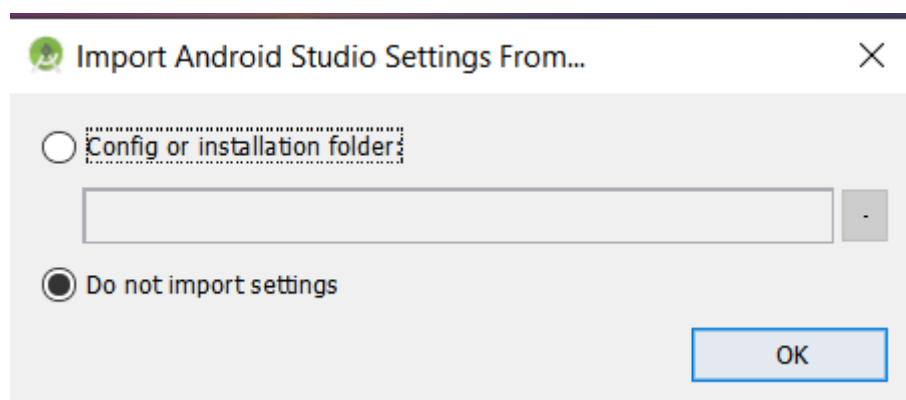

The following window would confirm the successful *installation*:

You need to select the "**Start Android Studio**" checkbox, which will open up the Android Studio application that just got installed on your computer. Next, the **Setup** wizard would follow.

Step 3. Android Studio Setup Wizard

This wizard will set up Android Studio for you for the first time usage. Proceed with default prompts.

Next, it would take your preferences for installation type and theme. Choose the "**Standard**" as an installation type.

Install Type

Choose the type of setup you want for Android Studio:

Standard

Android Studio will be installed with the most common settings and options.
Recommended for most users.

Custom

You can customize installation settings and components installed.

Cancel

DOWNLOAD OPTIONS

RELEASE NOTES

It will open up the **Terms and Conditions** pop-up. Select the checkbox that says *"I have read and agree with the above terms and conditions"* and click the "DOWNLOAD ANDROID STUDIO FOR MAC" button to start the download.

Download Android Studio

Before downloading, you must agree to the following terms and conditions.

Terms and Conditions

This is the Android Software Development Kit License Agreement

1. Introduction

1.1 The Android Software Development Kit (referred to in the License Agreement as the "SDK" and specifically including the Android system files, packaged APIs, and Google APIs add-ons) is licensed to you subject to the terms of the License Agreement. The License Agreement forms a legally binding contract between you and Google in relation to your use of the SDK.

1.2 "Android" means the Android software stack for devices, as made available under the Android Open Source Project, which is located at the following URL: <http://source.android.com/>, as updated from time to time.

1.3 A "compatible implementation" means any Android device that (i) complies with the Android Compatibility Definition document, which can be found at the Android compatibility website (<http://source.android.com/compatibility>) and which may be updated from time to time; and (ii) successfully passes the Android Compatibility Test Suite (CTS).

1.4 "Google" means Google LLC, a Delaware corporation with principal place of business at 1600 Amphitheatre Parkway, Mountain View, CA 94043, United States.

2. Accepting this License Agreement

2.1 In order to use the SDK, you must first agree to the License Agreement. You may not use the SDK if you do not accept the License Agreement.

2.2 By clicking to accept, you hereby agree to the terms of the License Agreement.

2.3 You may not use the SDK and may not accept the License Agreement if you are a person barred from receiving the SDK under the laws of the United States or other countries, including the country in which you are resident or from which you use the SDK.

2.4 If you are agreeing to be bound by the License Agreement on behalf of your employer or other entity, you represent and warrant that you have full legal authority to bind your employer or such entity to the License Agreement. If you do not have the requisite authority, you may not accept the License Agreement or use the SDK on behalf of your employer or other entity.

3. SDK License from Google

☒ I have read and agree with the above terms and conditions

DOWNLOAD ANDROID STUDIO FOR MAC

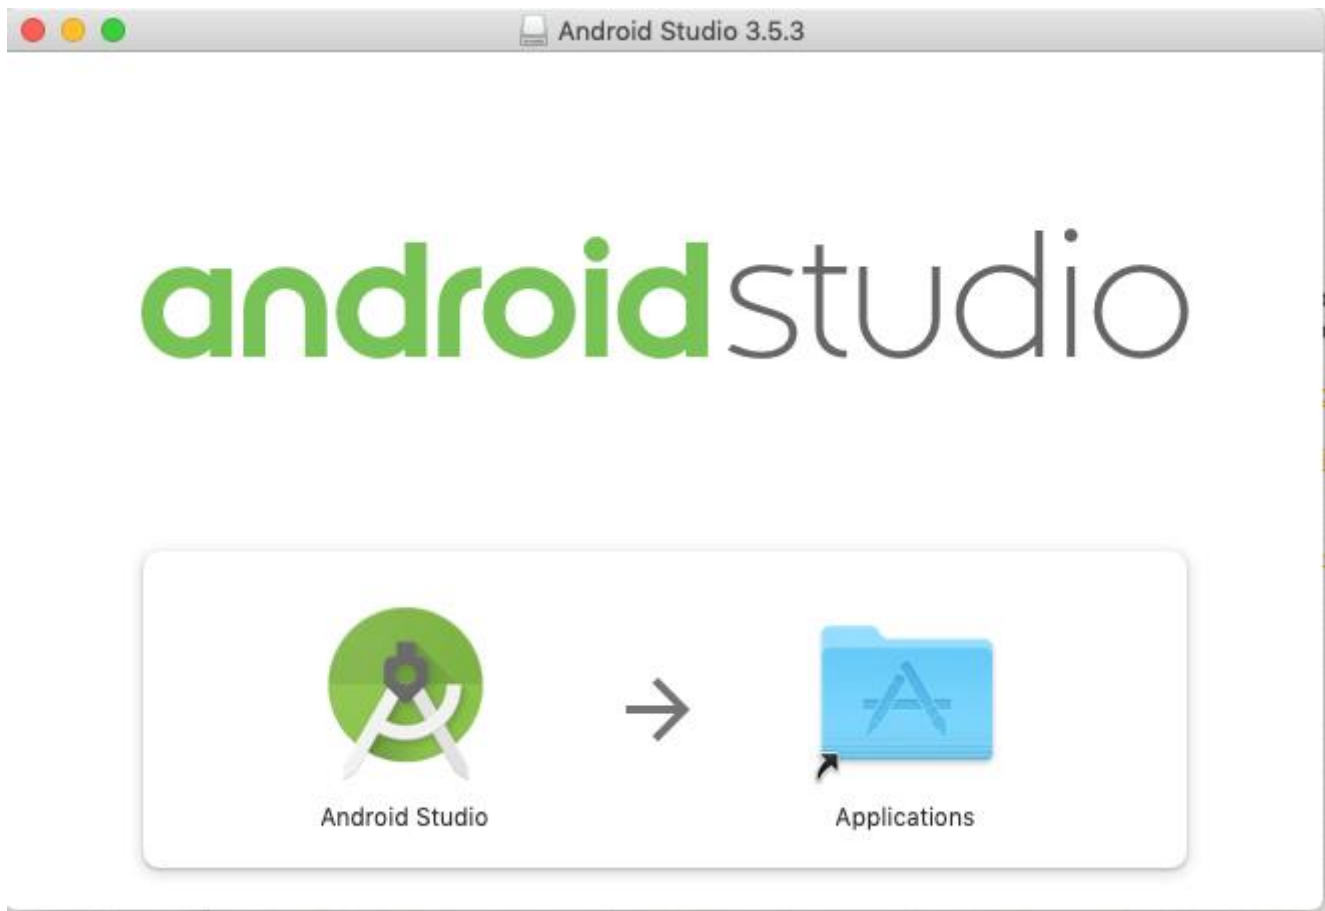

android-studio-ide-191.6010548-mac.dmg

Step 2. Install Android Studio

Double-click the downloaded **.dmg** file and proceed with the default prompt.

Drag the Android Studio icon into your "**Applications**" folder.

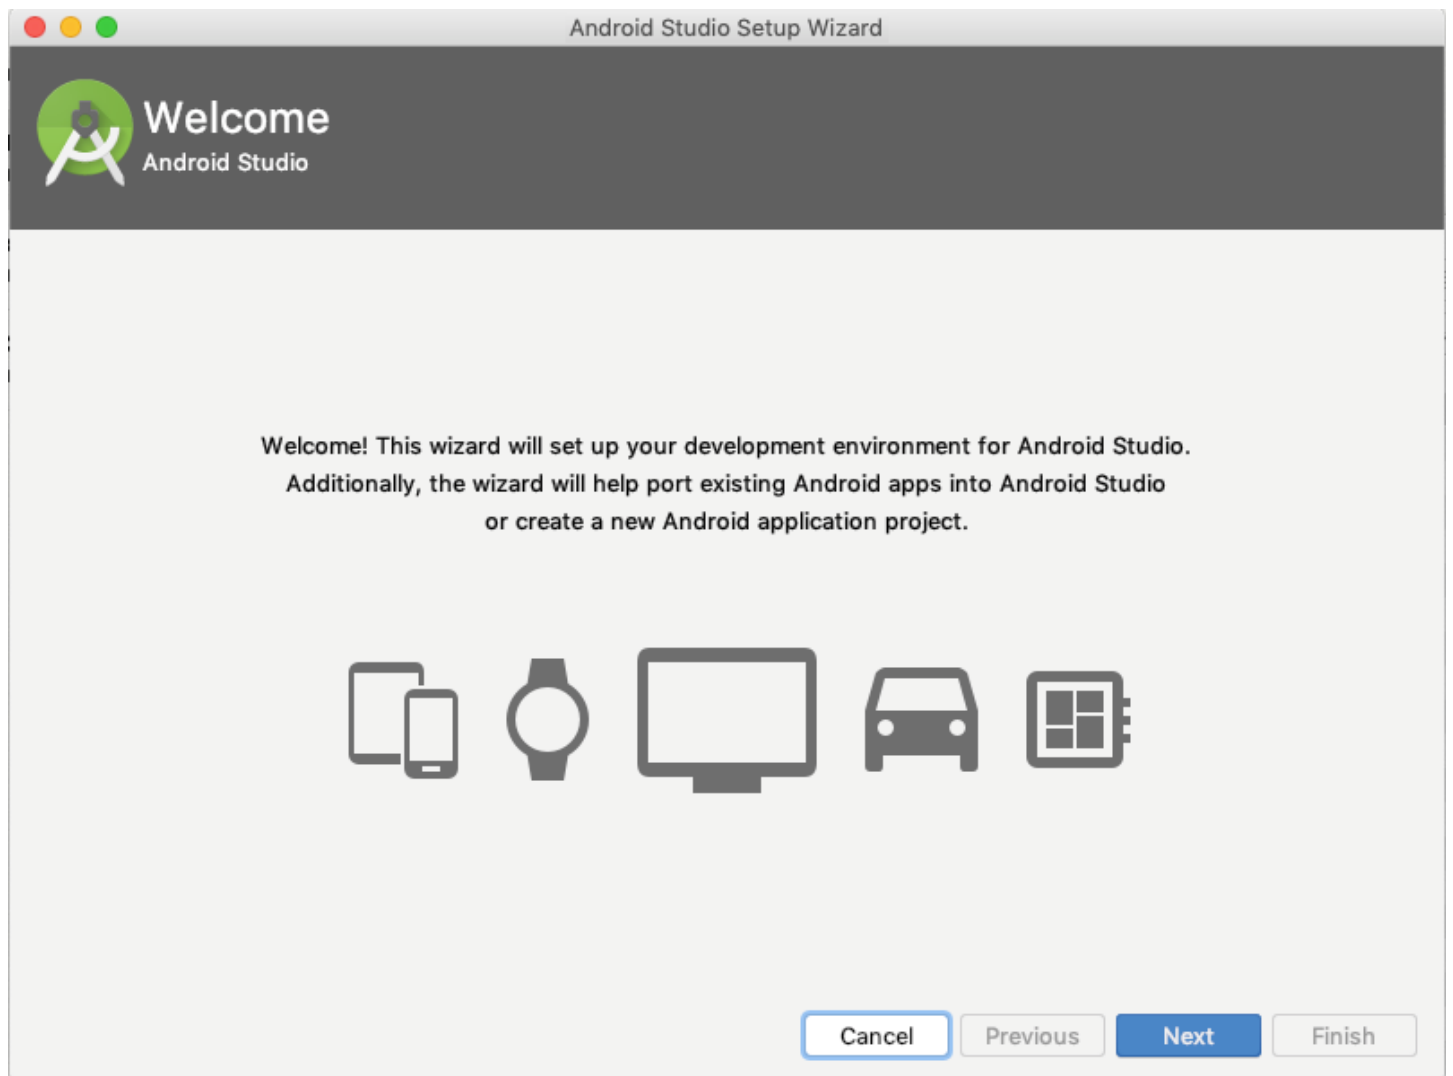

It would take while to copy into the "**Applications**" folder:

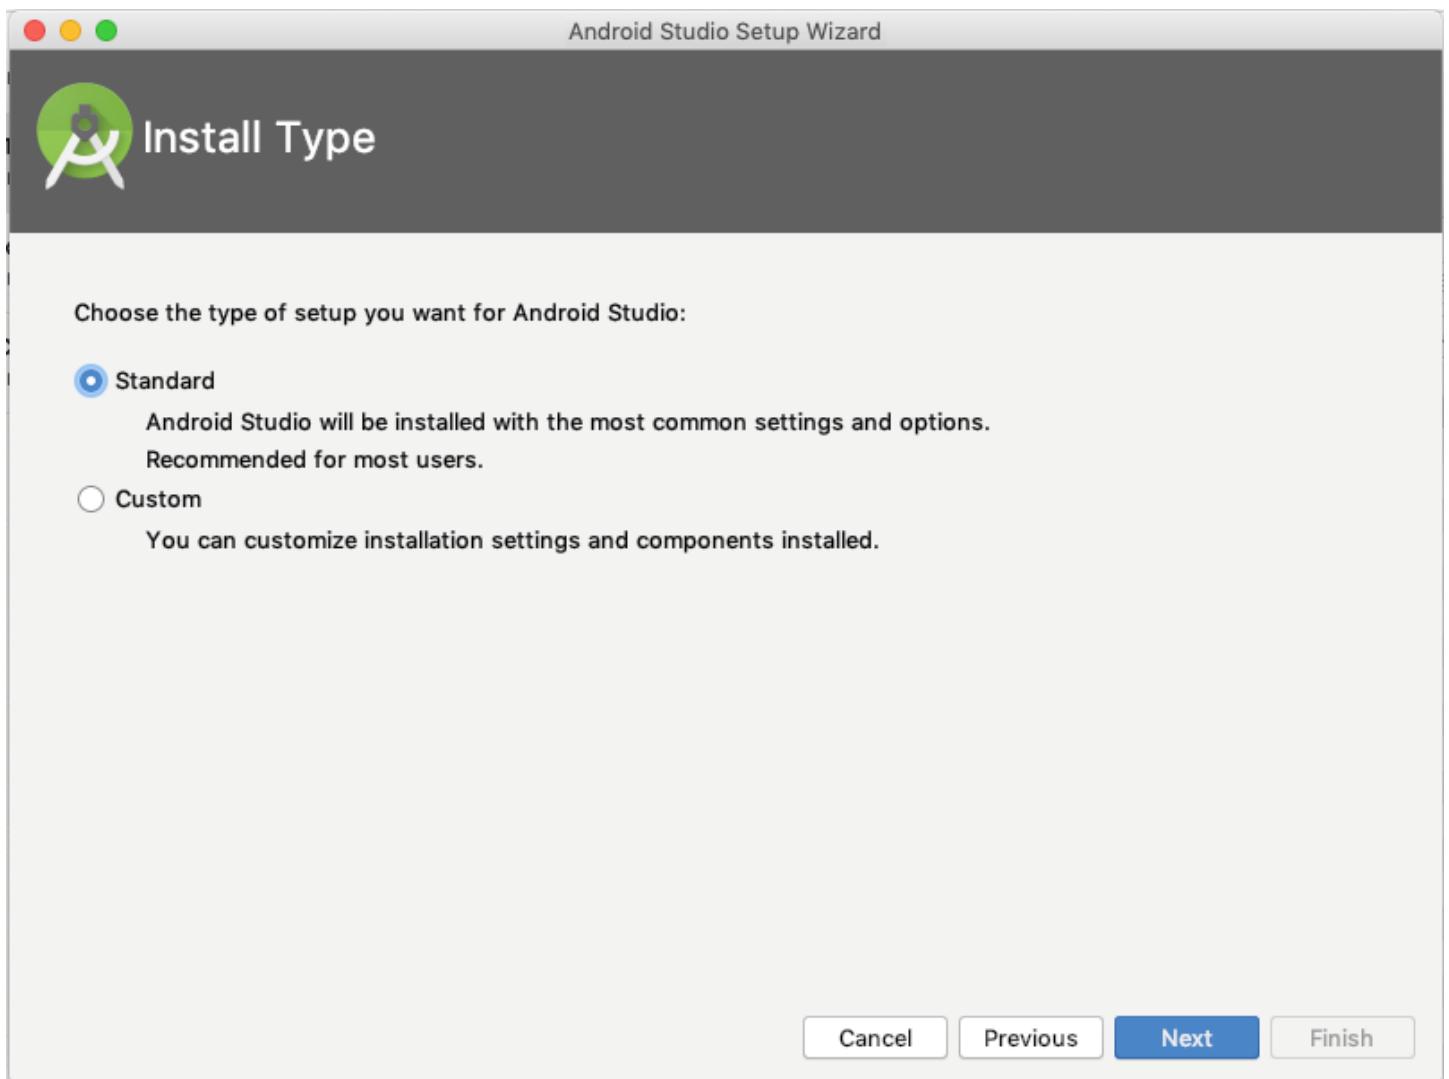

Step 3. Android Studio Setup Wizard

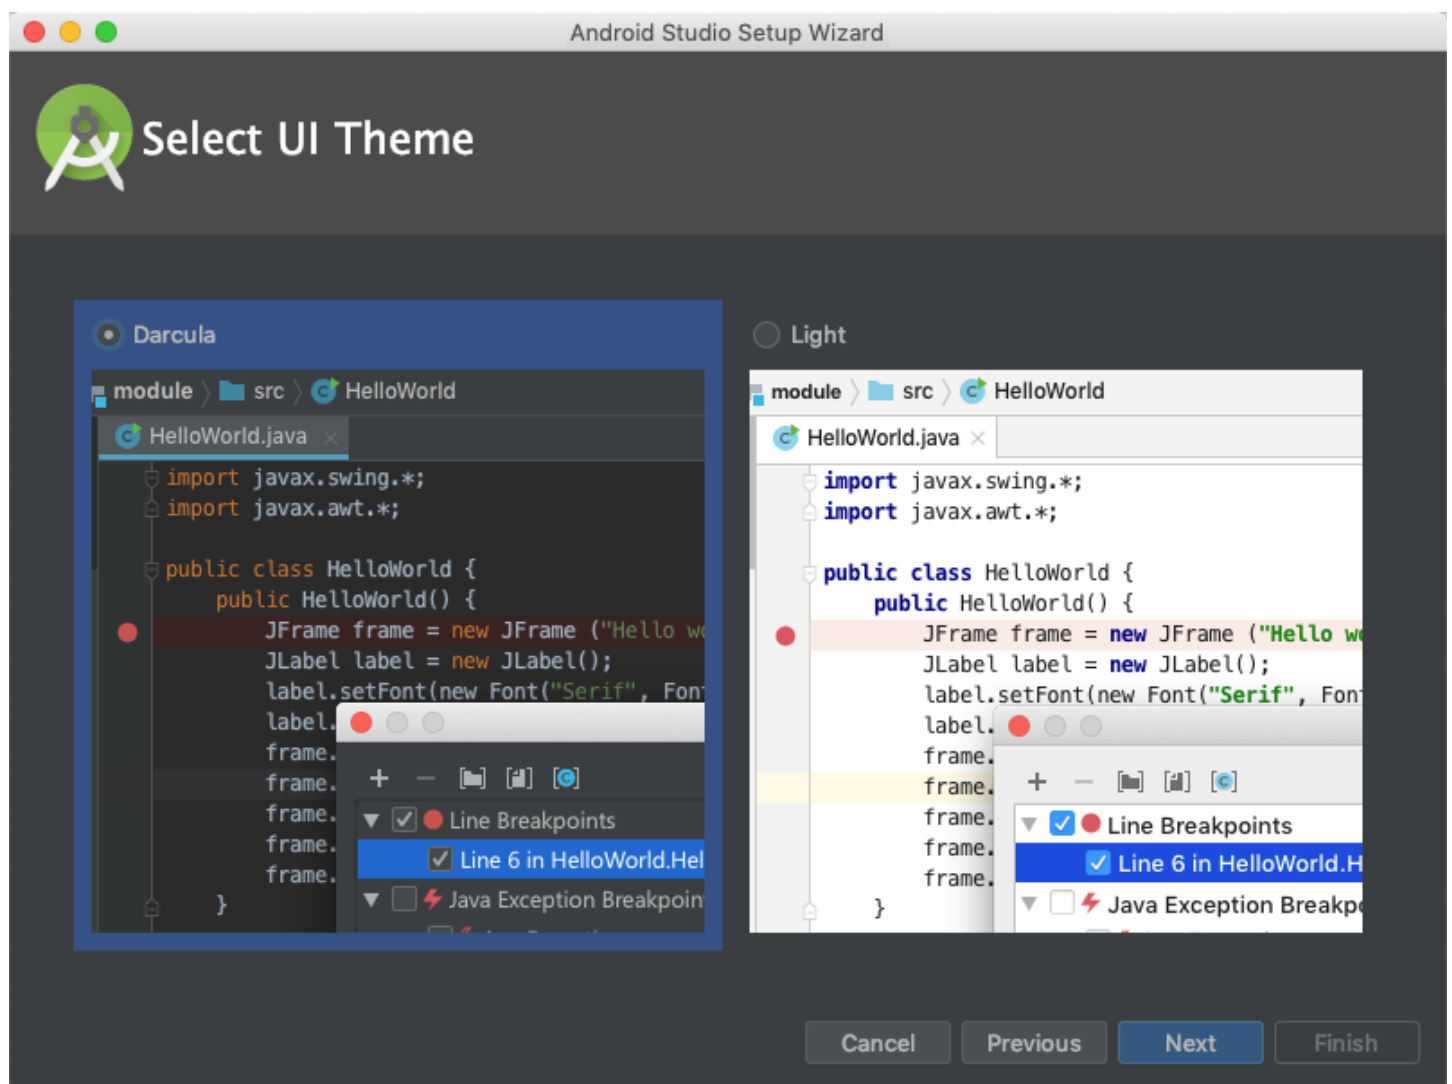

Open the Android Studio application that just got installed on your computer. It will open up a wizard to set up Android Studio for you for the first time usage.

Next, it would take your preferences for installation type and theme. Choose the **Standard** as an installation type.

Select the desirable theme - **Darcula** (Dark) or **Light** and proceed with the default prompt.

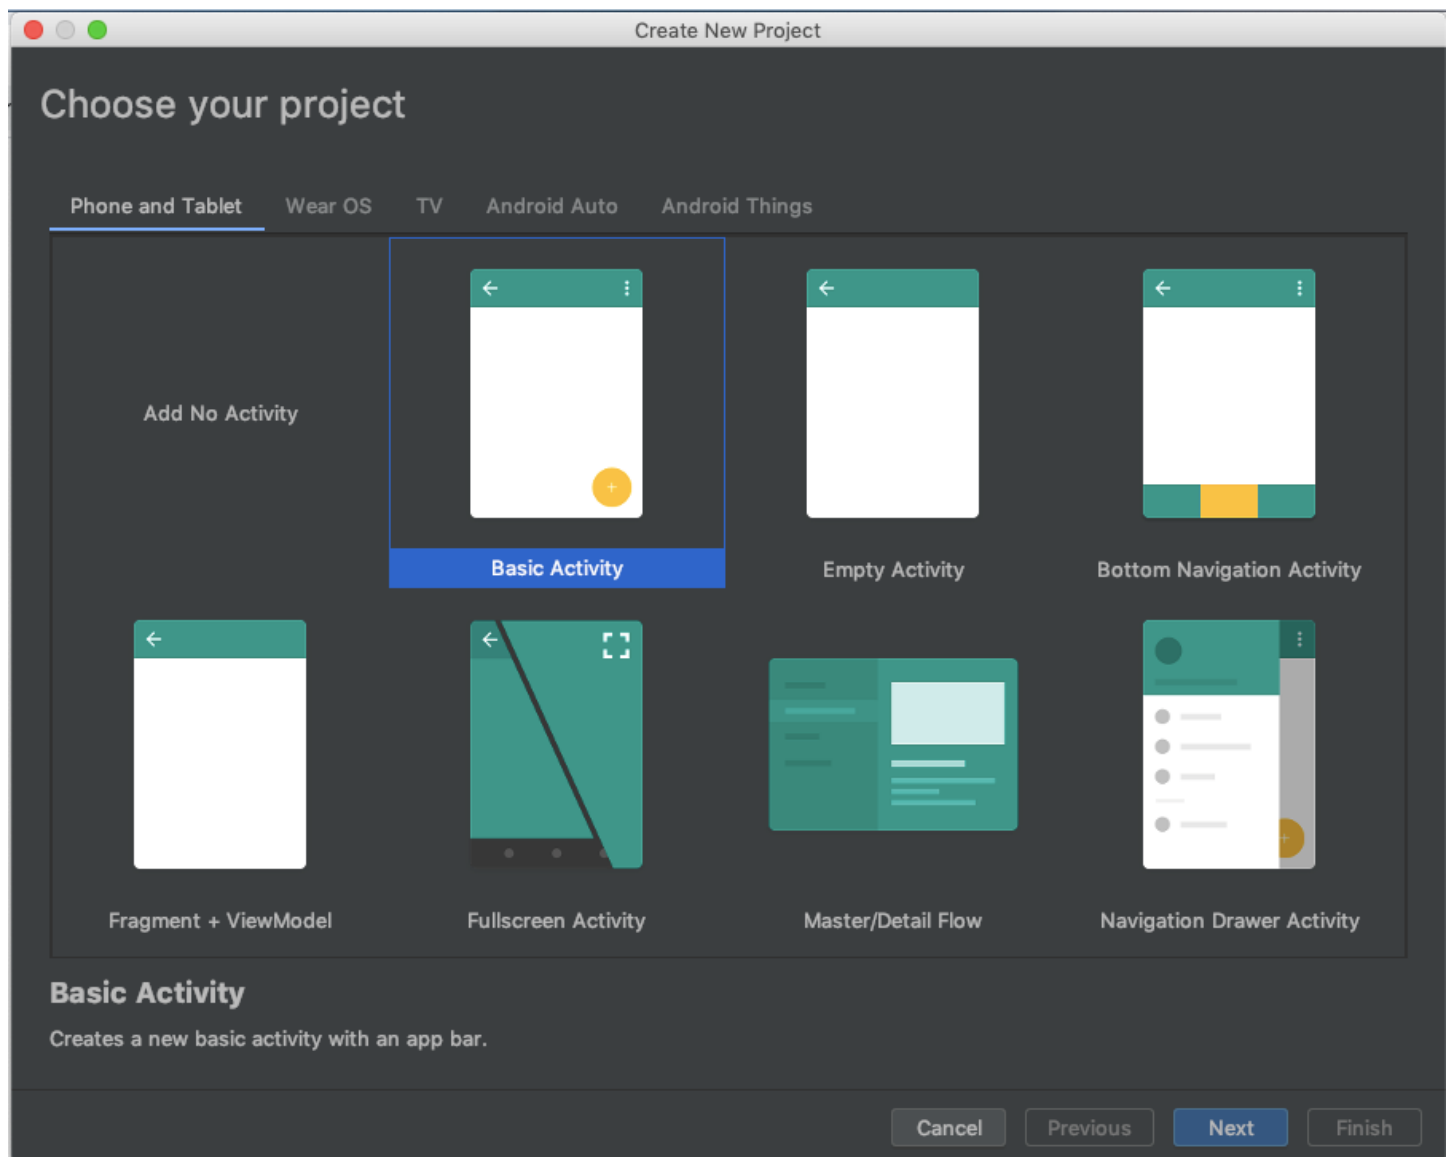

When you are finished, you would see the following screen:

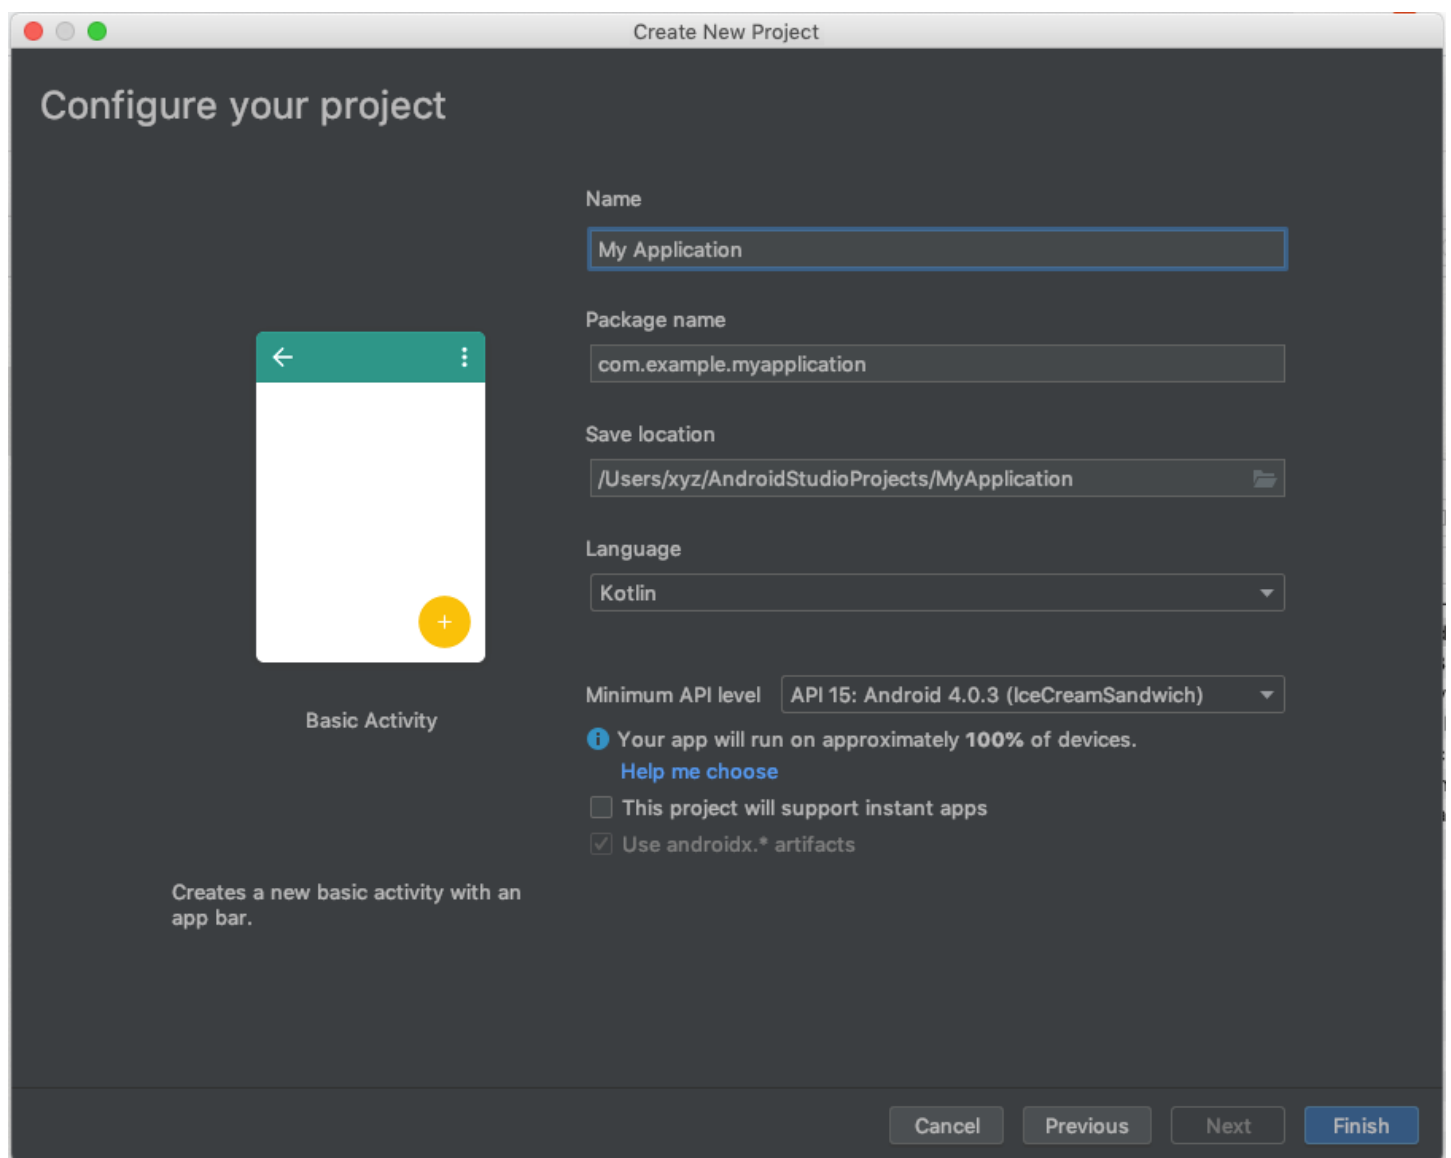

You may proceed to "**Start a new Android Studio project**".

Step 4: Start a Project

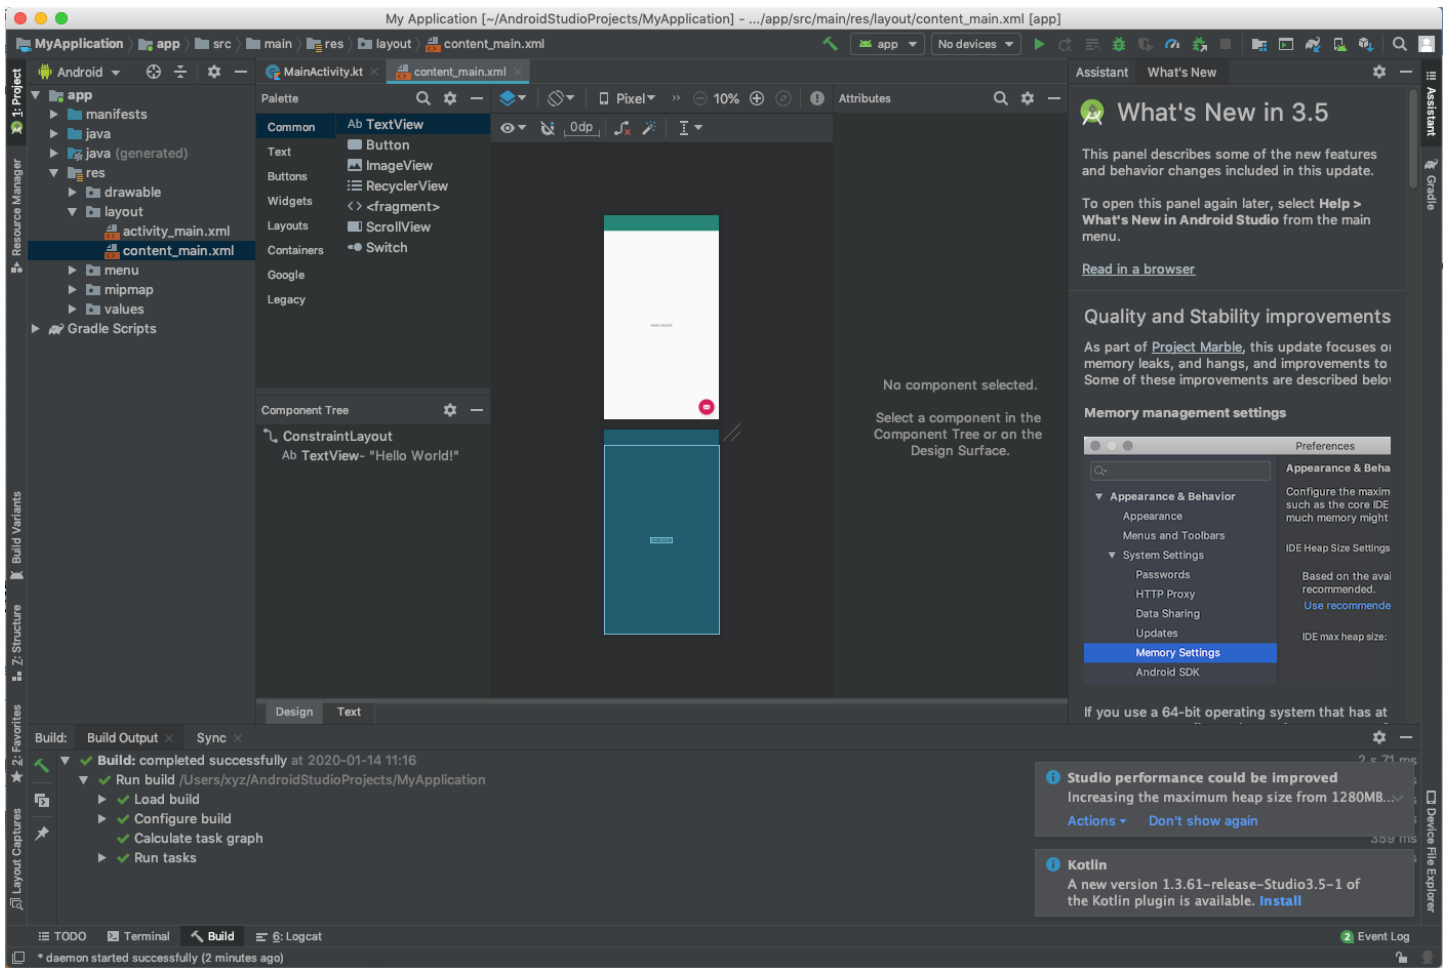

If you start a new project, it would ask you to choose from a set of templates, as follows:

For this example, we chose the “**Basic Activity**” template. Enter the necessary project-specific information such as Project Name, Package, Location (path), and Language in the next screen:

Following is the snapshot of the successfully installed IDE. You may choose to update the IDE and Plugins if prompted.

You are all set to develop Apps in Android Studio.

It will download a few more components, as shown below:
